

Project Increment – 4

RooHub Team 8:

Sree Rama Raju Pericharla	-	45
Shanmukha Reddy Aalla	-	01
Tejaswi Ganne	-	11
Sri Praneeth Iyyapu	-	16

Introduction:

Our project RooHub is about creating both Android and IOS applications for students of the University who all enrolls in the different classes or courses. It will be very helpful for them since they may feel difficulty in communicating with their peers efficiently. So we came up with this application in both Android and iOS by creating boardrooms and task trackers for each and every subject so that students can post their queries.

Objectives:

The main objective of our application is to minimize the hassles of the students since they can post their updates or queries in the boardrooms.

Features:

The main features of this application include the discussion boards for each and every subject and a task tracker which will be synced in calendars.

Detail design of Features:

Wireframes:

The application screenshots are as follows:

A wireframe for a login page. The page has a light gray background. At the top left, the word "Login" is written in a large, bold, sans-serif font. Below it, there is a white rectangular box containing two input fields. The first input field is labeled "Username" and the second is labeled "Passwrod" (note the typo). Below these fields is a "Login" button with a horizontal gradient. To the right of the button is a link that says "Forgot Password?". At the bottom left of the box is the text "New to RooHub? [Register Here](#)".

Mockups:

The deployed mobile application screenshots:

- The application's first page consists Login.
- The user can register himself using Register button.
- User can login to the application with his credentials after successful registration.
- The user goes to the homepage after the successful login where he can update his profile, go to task tracker and open boardrooms.
- User can add subjects in his profile in the boardrooms.
- Students can post some information about the subject or post any updates when clicked on any subject.
- We can create tasks by using task tracker.

Android Screenshots:

Android status bar showing icons for signal, Wi-Fi, battery, and time 8:36.

Screenshots for the Database:

The top screenshot shows the mLab MongoDB Deployments page. The user is logged in as 'sreeram66' (Sree Rama Raju). The page displays a table of MongoDB deployments under the 'Development and Utility' plan.

NAME	PLAN	RAM	SIZE	FILE SIZE
ds047752/ase_lab7	Sandbox	shared	8.73 KB	16.00 MB
ds019688/ase_ram	Sandbox	shared	8.52 KB	16.00 MB
ds015929/roohub	Sandbox	shared	59.56 KB	16.00 MB

The bottom screenshot shows the 'userdata' collection page. The user is logged in as 'sreeram66' (Sree Rama Raju). The page displays a list of documents in the 'userdata' collection.

Documents (aka Objects)

From the "Documents" tab you can browse and search for objects in this collection. All standard query constructs are supported except for map/reduce queries. To use map/reduce, use the MongoDB shell (note that temporary result collections will be viewable in mLab).

You can also add, edit, and delete individual documents from here. Bulk collection updates are not yet supported in this UI (although they are supported in the shell).

Delete database

To connect using the mongo shell:

```
% mongo ds015929.mlab.com:15929/roohub -u <dbuser> -p <dbpassword>
```

To connect using a driver via the standard MongoDB URI (what's this?):

```
mongodb://<dbuser>:<dbpassword>@ds015929.mlab.com:15929/roohub
```

mongod version: 3.0.10

Architecture Diagram:

Sequence Diagram:

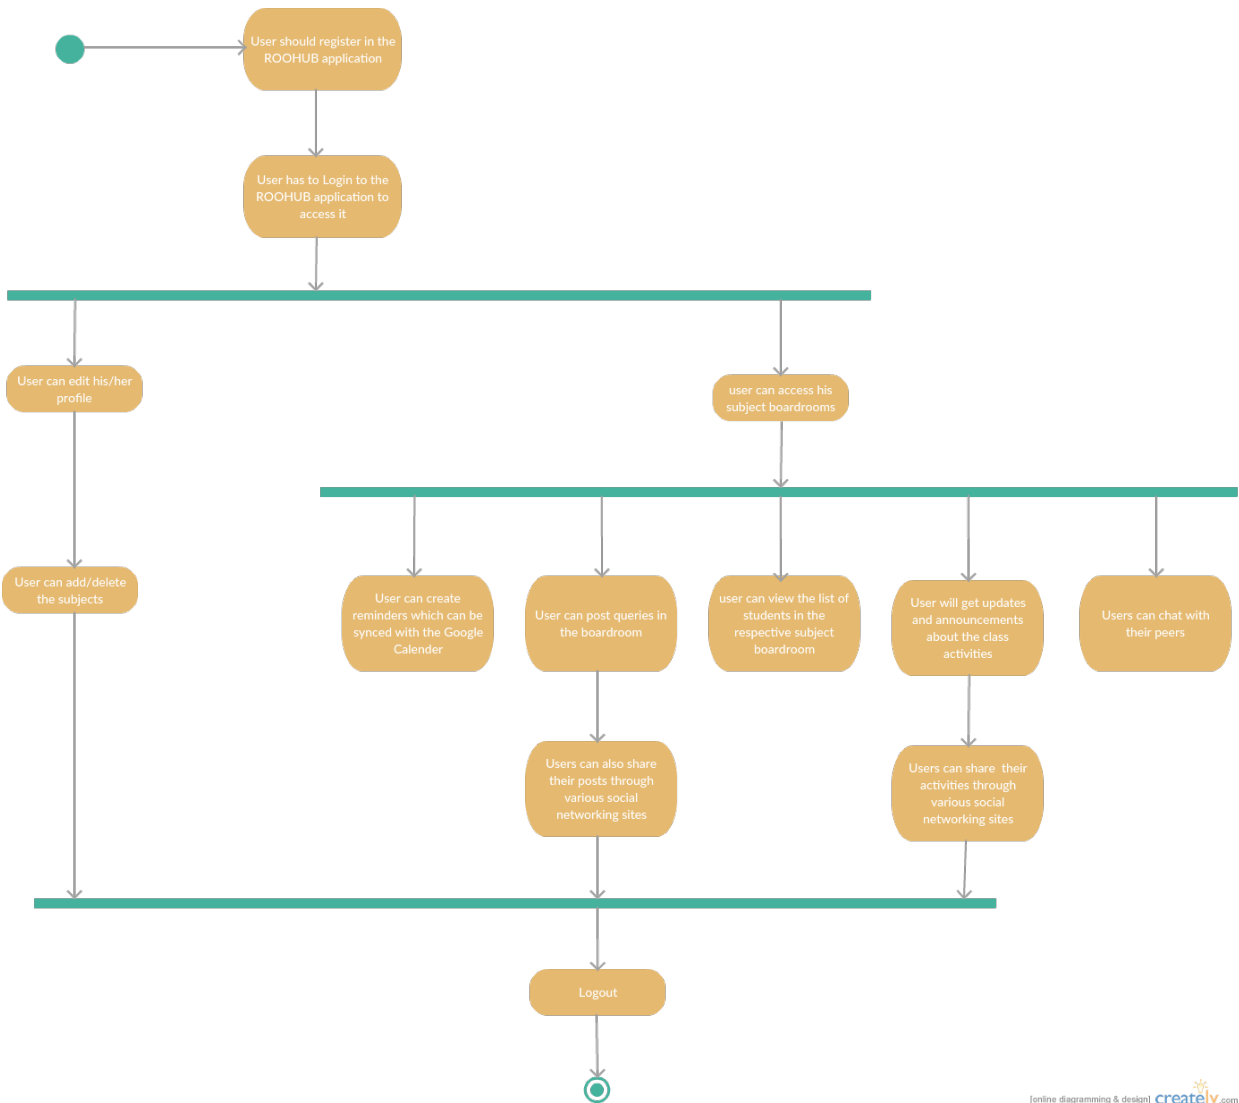

Class Diagram:

Use Case Diagram:

Activity Diagram:

Implementation:

We have implemented this on Ionic framework.

Server Maintenance:

Database: MongoDB.

Deployment:

We have deployed it on both mobile and also on web and the captured screenshots are explained above.

Project Management:

Completed work:

We have changed the order of the posts in the boardrooms in the subjects from the third increment. The posts are now visible directly when we enter the discussion room that is board room.

Time Taken:

100 hours.

Contribution:

We have contributed equally to the project.

Work to be completed:

We did everything that we have planned to do and also build an IOS app for our application.

Time to be taken:

NA.

Bibilography:
